Chaturbate estimate

New OnlyFans subscribers

Stream day (hours live)

Shaded days are stream days. Read down the shaded columns: income on top, new OnlyFans subscribers below.

Days follow your OnlyFans export. Chaturbate is a public estimate to 2 Oct.

[START HERE](#)

What worked, what *didn't*, and what to do.

WHAT WORKED

[STREAM TO SUBSCRIBERS](#)
[CHATURBATE + ONLYFANS](#)
[HIGH CONFIDENCE](#)
[PROOF: P3](#)

Stream days bring 7.3× the new subscribers.

On the 96 days you streamed, OnlyFans gained 27 new subscribers a day and 1,419 profile visits, against 4 and 296 on quiet days. The day after a stream drops straight back (3 new subscribers).

[SALES AFTER STREAMS](#)
[CHATURBATE + ONLYFANS](#)
[HIGH CONFIDENCE](#)
[PROOF: P5](#)

Sales spike in the 3 hours after you go offline.

Fans buy PPVs at 4.5× your normal rate in the 0 to 3h after a stream ends, then settle back to normal. The selling window is right after you sign off.

[TOP SUPPORTERS](#)
[CHATURBATE](#)
[HIGH CONFIDENCE](#)
[PROOF: P9](#)

Your top 5 give you 62% of what they spend.

\$806 of their \$1,303 in 30 days reached you; \$497 went to other rooms.

WHAT DIDN'T

[GAPS BETWEEN STREAMS](#)
[CHATURBATE + ONLYFANS](#)
[HIGH CONFIDENCE](#)
[PROOF: P3](#)

Weeks off cost you tips and fans who spend.

On days 7 or more after your last stream, OnlyFans tips ran 46% lower and 21% fewer fans spent, in 7 of 7 months tested. You went 7+ days without a stream 11 times (longest 25 days).

[SUBSCRIBERS WHO STAY](#)
[ONLYFANS](#)
[HIGH CONFIDENCE](#)
[PROOF: P7](#)

Arrivals are up, but paying renewals are flat.

New subscriptions rose from 104 to 747 a month while paid renewals stayed near 51. Auto-renew fell from 69% to 27%: most new fans leave when they expire.

[NEW-FAN QUALITY](#)
[ONLYFANS](#)
[HIGH CONFIDENCE](#)
[PROOF: P5](#)

New fans are spending less each month.

Of fans who joined in March, 17% bought within 30 days and each spent about \$44. For August, it was 4% and \$3. More people arrive; fewer of them spend.

DO NEXT

1

Never go more than 6 days without a stream

Your tips and spending fans hold up for about a week after a stream, then fall. Put a stream in the diary before day 6 so there is never a gap fans notice.

EVIDENCE · 7+ days off: tips -46%, 11 such gaps in 12 months, longest 25 days

2

Win the big spenders who are already in your room

Greet them by name, keep a premium item or goal on screen, and give quiet viewers an easy first step such as a small PM or Upvote. They are watching; they just are not being asked.

EVIDENCE · five viewers spent \$1,251 elsewhere in two weeks and tipped you \$2.91

3

Stretch every stream to 3.5 hours

Your hours pay about the same per hour whether the stream is short or long, so time on camera is income. 3 streams of 3.5h is 10.5h a week; you are at 8.6h.

EVIDENCE · about \$59 an hour in the last 6 months, so roughly +\$480 a month on Chaturbate alone

STREAMS AND SHOWING UP

A SCHEDULE BUILT FROM YOUR OWN NUMBERS

- **No gaps over 6 days.** Your numbers hold for about a week after a stream, then fall.
- **3 streams a week of 3.5h or more** (10.5h; you are at 8.6h). The extra 8h a month is worth about \$480 on Chaturbate at \$59 an hour.
- **Keep your usual start.** 36 of 98 streams started around 8 pm.

Streams are matched to same-day OnlyFans results: this shows timing, not proof of who came from where.

FROM STREAM TO SPENDER

Streams bring the crowd. *Fewer of them* talk, and fewer spend.

3,091 fans first contacted since mid-February, of whom 1,624 could be followed cleanly (23 team catch-up days left out). Outcomes only count once the window has passed.

OF EVERY 100 NEW FANS

1,244 fans old enough to judge at 30 days.
38% of buyers bought again.

WHERE THEY WERE FIRST CONTACTED

	FANS	REPLIED	BOUGHT IN 30D	SPENT	STILL ON
Stream day	1,188	45%	7.0%	\$12	11%
Day after	139	61%	12.5%	\$16	18%
Quiet day	297	56%	9.7%	\$11	18%

"Spent" = PPV per fan in their first 30 days. Stream days bring 25 new fans a day against 3, but they reply less (45% vs 56%).

WHEN PPV SALES LAND AFTER YOU GO OFFLINE (COMPARED WITH A NORMAL HOUR)

1.0x is the normal hourly rate. Sales run at 4.5x in the 0 to 3h after you sign off, then fall back to normal. Your team sold nothing across the 296 hours you were live.

YOUR COACH SAYS

A stream fills the funnel, but what you do in the next day decides what it is worth. The first message after someone joins is where the money is: most buyers buy on day one or not at all.

READING IT

- 39 of this week's 106 subscriptions were fans coming back: the cheapest sale you have.
- Paid renewals stay near 11 a week however many arrive: most new fans do not become paying renewers.
- 80 of 248 Chaturbate supporters came back from the month before.

YOUR COACH SAYS

Arrivals are not the problem. Look at the gap between how many come in and how many stay: reaching new fans in their first days, before they expire, is where the next gain is.

WHAT THIS SHOWS

- Hours live against profile visits: **0.78**, against new subscribers: **0.80** (1.0 = they move together).
- Against OnlyFans earnings it is looser (**0.36**): earnings also follow team selling.
- 5 of 12 weeks were low; the Why column says what happened in each.
- Our reading: regulars plan around when you are on, so a quiet stretch gives them a reason to look elsewhere. The numbers show the drop, not the reason.
